▲ In order to retain a competitive edge in the market place, enterprises find themselves constantly trying to optimize their business processes execution. Configo Reports is a step in the right direction

- ✓ 1. Meticulous Management
- 2. Saves Time
- 3. Enhances Control
- 4. Reduces overall Costs
- 5. Reduces paper work and documentation
- 6. Helps make informed decisions
- 7. Gives up-to-date information

✓ Compatible with Smart Devices

Technical Features

1. Management of any number and type of projects irrespective of their size.
2. Importing of pre-defined activities like details of Mark number and process to be done on them from outsourcing company, thus saving a lot of time and labour.
3. Scheduling and Monitoring of Activities.
4. Timely alerts & work progress.
5. Productivity of Labor and machinery.
6. On-Site Daily progress and Project assessment.

▲ Configo Reports

Targetted towards units that undertake tower fabrication.

Configo Reports is a flexible project management tool that enables the project manager to effectively plan, organize and control both simple and complex projects. It helps in scheduling and tracking all the activities and monitoring their progress.

Configo Reports effectively compartmentalizes the project specification enabling optimal usage of available resources.

Reconciliation of project w.r.t. materials can be done at a click of a button. Yearly reconciliation of all projects is very easily available.

Graphical representation of project status

Reports:

- a. Dynamic Report Generation : The user has an option either to use preformatted reports or to dynamically arrange columns according to specific needs,
- b. Status Reports : Various types of reports showing the status of projects, operations, inspection, dispatch and packing

This software is scaleable to handle even the largest operations, yet tailored for quick and efficient implementation and operation. It provides fully integrated, up-to-the-minute project management information.

Sub-contracts can also be meticulously managed as the software helps in tracking the supply of material and work allotted to various contractors along with their dates of completion. Configo Reports enables the user to track the dispatch of material & preparation of delivery challans.
